BANDUNG PILOT ACADEMY

ABOUT US

Bandung Pilot Academy (BPA) is a modern professional Pilot Training Organization in Indonesia, located in Bandung, Indonesian Aerospace City. As a pilot school that adopting the 21st Century Flying School, BPA develops the education and training syllabus, combining various teaching methods that enables each of pilot graduates have a flight skill (technical know how), knowledge and attitudes as the airlines industry needs.

BPA is not only a flight training, but also an Integrated Flight Education, because the method of training not only meet the minimum standard requirements CASR 141, every student is given debriefing and coaching, which is equipped with appropriate teaching and learning tools with the development of technology, such as Computer Base Training (CBT), Flight Training Device Red Bird FMX with G.1000 Instrument, Cessna 172 Series Aircraft equipped with Glass Cockpit Instrument also enhanced by the inclusion of Multi Engine Rating Program using Tecnam P2006T.

BPA is dedicated to the principle of maintaining the highest levels of safety, quality and integrity in communicating with people inside and outside of its bussiness operation.

TENTANG KAMI

Bandung Pilot Academy (BPA) adalah Organisasi Pelatihan Pilot yang modern dan profesional yang berlokasi di Bandung, Kota Dirgantara Indonesia. Sebagai sekolah pilot yang mengadopsi teknologi abad 21, BPA membangun silabus pendidikan dan pelatihan, dikombinasikan dengan metode pelatihan yang membekali setiap lulusannya memiliki skill terbang (*technical know how*), pengetahuan dan sikap yang dibutuhkan oleh industri penerbangan.

BPA tidak hanya melatih terbang, namun juga pendidikan terbang yang terintergrasi karena metode pelatihan yang tidak hanya memenuhi minimum persyaratan CASR 141, setiap siswa diberikan penjelasan dan pelatihan yang didukung oleh sarana pelatihan yang bermutu dan peralatan yang berteknologi terkini seperti *Computer Base Training (CBT)*, simulator Red Bird FMX dengan instrumen G.1000, pesawat Cessna 172-Series yang dilengkapi instrumen *Glass Cockpit* juga ditingkatkan dengan masuknya *Multi Engine Rating Program* menggunakan pesawat Tecnam P2006T.

BPA didedikasikan pada prinsip mempertahankan tingkat tertinggi pada keselamatan, kualitas dan integritas dalam berkomunikasi dengan setiap insan yang berada di dalam maupun diluar operasi bisnis ini.

PRE FACE

Air transportation has become a major requirement of the world including Indonesia. The rapid advances in the technology, especially air transportation is not being balanced comprehensively by the government and stake holder in aviation industry, in particularly flying school as a provider for a pilot resources.

There's a lot of concern for a flying school to creating a competitive human resources, likes developing professional pilot character with tough and creating priority culture to safety in every pilot student mind. Safety aspect must always be a priority both in technical implementation of training and in the flow of education system, so that it becomes an inherent culture for prospective pilots who will work in aviation bussiness in the future.

Bandung Pilot Academy as a leading pilot school in Indonesia, it is the only pilot training that applies methods "Airmanship Character Building", where every students and graduates has the skill, knowledge and aptitude of a real pilot and which has a culture to proritizes aspect of aviation safety and security. This culture of airmanship and safety priority is believed to be an added value as provision for BPA graduates to be winning in global competition.

We invite youth people to being a part of BPA who will educated and trained by our experience instructor, supported by modern infrastructure and adequate facilities.

Respectfully Regards

Novin Wiryanto
Director

KATA PENGANTAR

Moda transpotasi udara sudah menjadi kebutuhan utama masyarakat dunia, tanpa terkecuali di Indonesia. Pesatnya kemajuan dunia di bidang teknologi, terutama transportasi udara belum berimbang bila ditinjau secara komprehensif, oleh pemerintah dan para pelaku industri kedirgantaraan, termasuk sekolah pilot sebagai penyedia SDM Pilot.

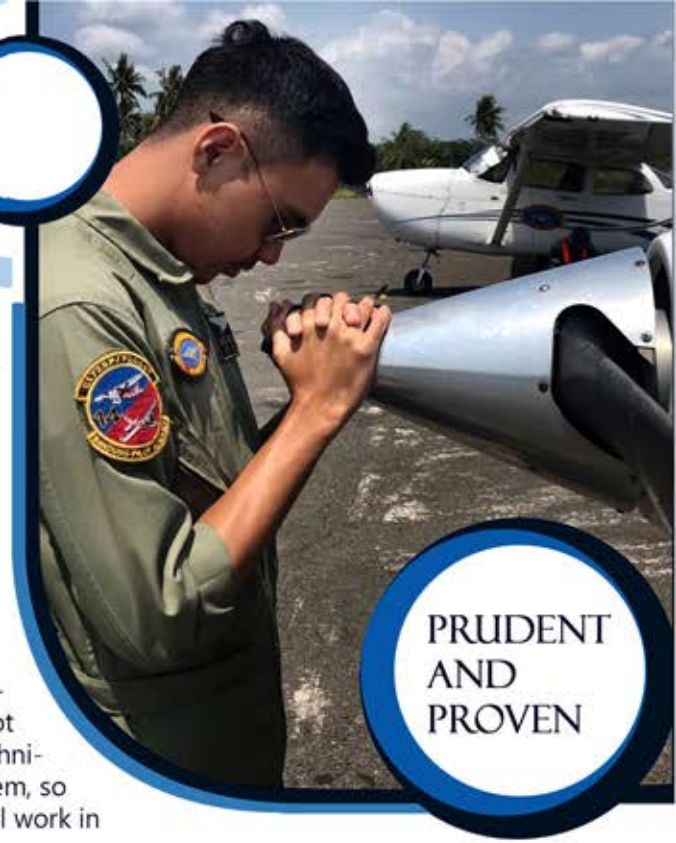

Banyak hal yang harus diperhatikan oleh sekolah pilot dalam upaya untuk mencetak SDM yang unggul, antara lain adalah membangun karakter pilot profesional yang tangguh dan menanamkan budaya prioritas pada keselamatan dalam jiwa setiap siswa pilot. Aspek *safety* harus selalu menjadi prioritas, baik dalam teknis penyelenggaraan latihan maupun dalam aliran sistem pendidikan sehingga menjadi budaya yang melekat bagi calon-calon pilot yang kelak berkarya di dunia penerbangan.

Bandung Pilot Academy sebagai sekolah pilot unggulan di Indonesia, merupakan lembaga pendidikan dan pelatihan pilot yang menerapkan metode pendidikan "*Airmanship Character Building*" dimana setiap siswa dan lulusannya memiliki keterampilan, pengetahuan serta perilaku seorang pilot sejati, serta memiliki budaya yang selalu mengutamakan aspek keselamatan dan keamanan. Budaya *airmanship* dan *safety priority* ini di-yakini menjadi nilai tambah sebagai bekal lulusan BPA untuk dapat unggul dalam persaingan global.

Akhir kata kami mengundang generasi muda untuk menjadi bagian dari civitas BPA, yang akan dididik oleh para instruktur berkompeten dan berpengalaman di dunia pendidikan pilot serta pelatihan yang ditunjang dengan kelengkapan fasilitas dan infrastruktur modern.

Salam Hormat

Novin Wiryanto
Direktur

Sistem silabus dan metoda pembelajaran di Bandung Pilot Academy berfokus pada pembentukan mental dan karakter pilot yang memiliki *Air Manship* yang tinggi dengan mengadopsi perkembangan teknologi terkini
